

## **Facilities Department**

Our Department is responsible for the operations and maintenance of the Jersey City Board of Education's buildings. We are charged with making certain that these facilities are safe, clean, and comfortable for students, staff and visitors every day. To accomplish this, we employ an army of skilled trades people—carpenters, plumbers, electricians, electronics repairers, plasterers, masons and laborers—and custodians, groundskeepers, and licensed boiler operators.

The Facilities Department also helps to plan and oversee the District's multimillion-dollar School Construction Program. In the months ahead, we plan to build five new schools at a projected cost of \$148.8 million.
