

Student Transportation Department

Every day about 3,400 Jersey City students travel to and from school and other activities on the more than 200 school bus routes in our District. These routes are supported by our own buses and by those operated by contracted vendors. Additionally, we provide transportation for our athletes, and for students traveling to field trips, special events, and many other activities that support classroom learning.

The Student Transportation Department is responsible for distributing **bus tickets**, which are available to elementary (K-8) students who live 2 or more miles from their assigned schools, and high school (9-12) students who live 2.5 miles or more from their assigned school (Special Education and Special Needs students are exempt from the mileage requirements). All requests for bus tickets must be completed by a student's principal or another authorized person from his/her school.
